## ABOUT MACAW

As former elite military forces personnel, we are best placed to understand the vital importance of security. We have utilised our military mindset together with the most advanced technology available to create a layered security system based on prevention, detection and response which affords complete peace of mind.

Macaw Security Solutions provide ISO9001 and ISO14001 accredited security as part of a holistic, multi-layered defence strategy to protect:

- Warehouses
- Construction sites
- Vacant property
- Warehousing & housing developments
- Public buildings
- Schools
- Retail Premises

## LAYERED APPROACH

Our holistic security strategy acts as the ultimate deterrent because if one element is breached, further layers also have to be overcome before security is compromised:

- Perimeter
- Visible deterrents
- Physical security
- Access control
- Texecom Intruder System
- HD CCTV
- Audible alert challenge
- EMCS Monitoring
- Security team intervention
- K9 dog response unit
- Police instructed response

### OUR MISSION

“To provide the highest standard of security to protect client property, assets and reputation by implementing effective security solutions in order to give peace of mind via an individually tailored service”

# SECURITY SERVICES

## PREVENTION

### SITE SURVEY

Our intricate risk assessment enables us to design bespoke security solutions that are appropriate for and tailored to you and your projects specific needs including the use of drones on larger developments (We often use drones) to assist with (develop) a detailed understanding of your sites external environment so we can easily identify and overcome any vulnerabilities, misconfigurations and local antisocial behaviour issues.

### DETERRENTS

Macaw's accredited team will install and maintain a carefully planned security perimeter and make use of visible deterrents such as fencing, concrete blocks, thermal and remote wireless cameras. We (can) also offer a physical security presence, in the form of K9 support, should this be required.

We implement Access Control via electronic systems that permit only authorised personnel via PINs, key cards/fobs, fingerprints, access badges and video verification.

Find out more below about our premium intruder and CCTV systems, their presence acting as a strong deterrent.

## DETECTION

### SURVEILLANCE & ALARMS

The Texecom Intruder Alarm Systems Macaw will install use motion sensors to detect intruders before they enter the premises and will instantly alert our 24/7 NCSI Gold ARC (alarm response centre) partner EMCS, if necessary.

Macaw's HD CCTV systems remotely monitor your property and assets for the continuous visibility

needed to eliminate blind spots. An audible alert challenge will notify a potential intruder that police are on the way or Macaw's K9 Unit based upon the project are being deployed.

### EMCS MONITORING

Live 360 CCTV footage is streamed to EMCS Monitoring Station, the UK's only truly independent alarm receiving centre that operates 24/7 365 days a year. Suspicious activity will result in immediate action from our dedicated team which is logged and completely accountable.

## RESPONSE

### 24/7 INTERVENTION

In the unlikely event of a breach, our security personnel team of SIA accredited professionals are poised to intervene around the clock, 365 days a year.

Our team is supported by K9 Units and we will immediately inform the police of any criminal activity.

## POTENTIALLY LOWER INSURANCE

As well as feeling safe in the knowledge that your property and assets are being protected by the best possible security, insurance companies acknowledge the professional measures you have taken. (Tend to look kindly on the measures you have taken.)

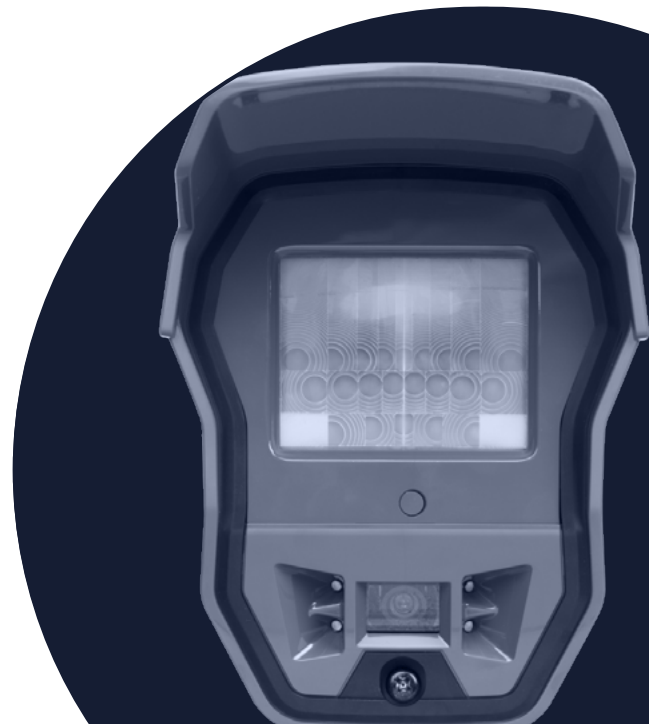

Your property will be perceived as posing less of a risk and therefore you should benefit from a reduction in your insurance premium.

## COMPARABLE BENEFITS V OTHER COMPANIES

Macaw – the only option for fully comprehensive security protection and complete peace of mind:
