

SECURING YOUR LEGACY

MACAW[®]
SECURITY SOLUTIONS

MACAW Security Solutions bring together technology, design, installation, monitoring, maintenance and consultancy to government, organisations and businesses across the UK.

Providing you with the best technological security systems coordinated by our elite security professionals with the experience to detect and deter criminal behaviour giving you peace of mind at all times, allows us to meet our two method approach.

Our elite security professionals combine the best technological security systems with their unique experience to detect and deter criminal behaviour giving you peace at all times via our twin method approach.

Our team of security personnel are drawn from an elite pool of ex

British Military who's skill set and experience provides the expertise to effectively detect and deter criminal activity.

Through in-house elite security insights we have developed a comprehensive multi-layered defence strategy which always ensures you are one step ahead. Our layered security approach provides inherent redundancy for maximum protection. Each security layer is designed to detect, deter and respond to all security issues and threats.

MACAW's dedicated commercial and operations team provide you with 24/7 monitoring and supervision of your assets using a mixture of state of the art monitoring through EMCS, CCTV Technology, Intruder Alarm Systems, Access Control, Response, K9 Dog Units & Physical Barriers.

ACCREDITATIONS

We believe in always maintaining and evolving best practice which is why we are:

- Building Confidence Accredited
- SSAIB Certificated for Access Control Systems
- SSAIB Certificated for CCTV Systems
- SSAIB Certificated for Intruder Alarm Systems
- SSAIB Certificated for ISO9001
- SSAIB Certificated for ISO14001
- SSAIB Certificated for Detector Activated CCTV Systems
- SafeContractor SafePQQ Verified

Our regional presence and head office near the M6 in Birmingham provides us a strategic platform from which to deploy our team and security assets.

Our Birmingham office provides easy access to the cities road network and a centralised base for our team members for briefings, asset setup and time out.

We have an extensive network of Ex Armed Forces personnel who are based in the Midlands.

Their extensive military training means they are used to plugging directly into existing security setups, liaising with other City based civilian stakeholders and government agencies.

We believe we have a unique, scalable and professional presence that benefits from local knowledge and background, whilst drawing on world class expertise and training.

A plug and play security system built on military thinking with civilian delivery. Giving you the best of both worlds.

WE HAVE SIGNED THE ARMED FORCES COVENANT!

The Pledge acknowledges and recognises the sacrifices and efforts made by our heroes in the armed forces. Through this association, we can illustrate, as an organisation, we care about the treatment of any citizen who has helped to protect our nation and keep us safe. The Pledge focuses on ensuring those who have surrendered their freedoms for our protection are treated with fairness and respect in all aspects of their lives. Safeguarding their welcome back into society and having access to the same opportunities as the broader public. It ensures they have the right support available to them, including help with education, finding accommodation, alternative career paths, healthcare, financial support and being able to have discounts.

As ex British Military ourselves, we value the hard work, risks and the sacrifices made every day by those who put our freedoms first. We feel privileged to be part of the bigger picture.

RAPID DEPLOYMENT TOWERS

Rapid-deployment CCTV Towers are specifically designed to provide all-in-one site security for temporary sites such as public events, construction, demolition and highways infrastructure projects.

They provide a visible deterrent, helping to prevent trespass on to your sites before they occur and as truly rapid-deployment solutions they can be installed and operational in a matter of minutes.

Our CCTV Tower can be stand-alone or networked to multiple CCTV towers to give a full layer of site protection. This robust mobile CCTV solution can be easily installed in any location, no matter how remote or challenging, and can be moved, added to or reduced in capacity according to the dynamics of a site.

Our team utilise the Macaw Layered Security approach to best place these assets in the field and maximise coverage, whilst reducing costs.

K9 SECURITY

Our detection dog teams can be used in a variety of operational deployments to actively seek and indicate on the presence of the scent they are trained on i.e. explosives or illegal and legal drugs, also Pyrotechnics such as flares.

Our fully trained canine and accredited handler team deliver this through non-intrusive methods, therefore not infringing on human rights. Due to a dog's ability to effectively detect minimum traces of contraband and explosive materials, the request for our specialist dog units is rapidly growing.

There are two types of drug detection search methods we deploy:

- **Passive** is the screening of persons and their luggage at requirements including ingress at stadia.
- **Proactive** search methods are carried out through 'free search' of buildings, vehicles and routes such as stadiums, pre match to ensure a thorough search of high-risk areas. All handlers and canines are rigorously trained with different scenarios including indication upon a person for drugs and pyrotechnics as well as the law with the Misuse of Drugs Act and adhere to the Ground Safety legislation.

We are highly experienced at deploying K9 detection teams to football stadia, multiple race courses and music concerts and events.

SECURING YOUR PEACE OF MIND!

LONDON 2012

We were trusted and tasked with the protection of high net worth overseas individuals, providing close protection and security risk mitigation services.

We delivered, planned and executed entry and exit support to the events with fast patrol boats on the Thames. This ensured we could limit exposure to threats and maximise access and maneuverability options in a crowded city with congested highways. Our strategic plan was to maximise entry and exit options should threats emerge alongside providing a non-intrusive VIP security presence.

Drawing on our extensive British Military experience of insertion and extraction in live conflict zones meant we were best placed to deliver this highly sensitive agreement.
