SECURING YOUR PEACE OF MIND

ABOUT MACAW

As former *elite military forces* personnel, we understand the vital importance of security and are top of our game with many *high-profile* footballers engaging our services. We have combined our military mindset with the most advanced technology to create an elite home security system for your complete peace of mind.

Macaw Security Solutions provides accredited security as part of a multi-layered defence strategy: prevention, detection and response. Just like on the pitch, one breach doesn't mean that defence is totally compromised because the back up support is there.

You can control your security system from our Smartphone App and this can be integrated with your home entertainment system, so everything is in one place.

Combined with Henleys impenetrable secure steel doors that provide a safe room type service, Macaw's got it all covered so you can focus on working and playing hard.

LAYERED SECURITY SERVICES (THE MACAW APPROACH)

Prevention

We visit your home to help us understand your security needs so we can design your appropriate safety solution.

Our accredited team can install and maintain:

- High security external & internal doors which can create a safe room
- HD CCTV, thermal and remote wireless cameras
- High Tech Wireless Intruder Alarm, controlled from a Smartphone App
- Access control (PINs, fingerprint tech etc) so only invited guests can enter

Detection

The Texecom Intruder Alarm System Macaw install use motion sensors to detect intruders before they enter and will instantly alert our 24/7 alarm response centre.

Live 360 CCTV footage is streamed to our EMCS Monitoring Station, the UK's only truly independent alarm receiving centre that is always open.

Suspicious activity will result in immediate action from our dedicated team.

The intruder alarm and CCTV can be integrated into a Smartphone App so you can interact with and control the settings whether you're home or away.

Response

In the unlikely event of a breach:

- 24/7, 365 days a year immediate response from security team
- SIA accredited professionals attend your home
- We will instantly inform the police of any criminal activity
- Support from K9 Unit if also deployed upon the property grounds
- An intruder will be told by an audio announcement that trained dogs are being deployed immediately

OUR MISSION

“To provide the highest standard of security to protect client property, assets and reputation by implementing effective security solutions in order to give peace of mind via an individually tailored service”

MR J MCGINN

ASTON VILLA FC / SCOTLAND INTERNATIONAL

Macaw Security Solutions protect and monitor my home after installing a CCTV and Intruder Alarm System with Police instructed response. The 24/7 support I receive from Macaw is massively reassuring when I'm training, playing club and international games here in the UK and aboard. With the high level of installation and on going monitored support, Macaw offer a complete security solution. The guys are discrete, friendly and professional when attending my home and always give me the right information to any question I may have. I have recommended Macaw Security Solutions to my team mates who also use their services.

MACAW K9 RESPONSE UNIT

Man's best friend and also, "The best form of Physical Security". We have a team of professional dog handlers and well-trained dogs working round the clock. Our dogs are trained to pick up on intruders or hidden persons within the site boundaries of your property, they are trained to protect their handler and the property by standing their ground and showing controlled aggression. They are also trained to accept other people in their environment and to only react, on command, of their handler if a specific threat is made against the handler.

In addition to conducting regular patrols, the K9 Unit will act as a QRF (Quick Reaction Force) in case of any camera activations, which are relayed live time by our 24/7 ARC (Alarm Receiving Centre) to the K9 Unit on the ground.

Real peace of mind comes from the knowledge Macaw Security Solutions have you and your property well guarded.

HENLEYS SECURE STEEL DOORS

In the highly unlikely event of an intruder entering your home, we can create bespoke safe rooms from any existing room in your house, or we can build a new one from scratch acting as the final layer of security.

We modify walls and install timber finished steel security doors and frames to make a secure zone that can withstand attacks from tools and even firearms. Choose from a 6 or 12 point locking system.

Unlike our competitors, our Police Approved signature steel reinforced cored doors can be finished with any high quality material you like to match the other doors in your home or add an extra element of luxury.

AV / ELECTRICAL INTEGRATION

You can control not only your security measures but also your home entertainment systems from our Smartphone App, receiving alerts when something is amiss. It's simple to select and change the settings for your:

- ☐ Gaming room
- ☐ Entry access
- ☐ Multi-room music and TV
- ☐ Home Cinema
- ☐ Blind/ curtain control
- ☐ Lighting and heating control
- ☐ Wi-Fi, so the kids can't get online at certain times

SECURING YOUR PEACE OF MIND!

Texcom intruder alarm system

Installed by our highly experienced Macaw domestic dedicated installation team.

Smartphone control

Interact and control your security system like never before.
